About Me

I'm a passionate game developer, software engineer and data science engineering student with experience in creating interactive experiences and solving complex problems. I enjoy building games, tools, and applications that provide value.

Experience

Jul 2024 - Sep 2025

Internship at SQUARE-IT

Developed a comprehensive career management HRMS fullstack application. Gained hands-on experience in enterprise software development, database design, and collaborative development practices. Used ASP.NET for the backend and Angular for the frontend.

2021 - 2025

Freelance Game Developer

4-star rated on both Upwork and Fiverr, working on independent game projects and client work with a focus on quality, reliability, and clear communication.

[Fiverr Profile](#)

[Upwork Profile](#)

2021 - 2024

Senior Game Developer

Worked on game prototypes and a commercial indie title as a solo developer, handling all in-engine responsibilities including programming, tool creation, level design, and gameplay implementation.

[Stock Boy](#)

Education

2023 - Present

Data Science Engineering Degree - ESPRIT

Currently pursuing an engineering degree in Data Science, focusing on machine learning, statistical analysis, and software engineering.

2020 - 2024

Pre-Engineering Degree - IPEIB

Completed a multidisciplinary preparatory program with a strong foundation in mathematics, physics, and computer science, preparing for competitive engineering schools.

Volunteering

Tools & DevOps

Git

GitHub

Docker

Blender

Photoshop

Figma

2023 - 2025

IEEE Member

Active member of the Tek-up IEEE Student Branch, participating in technical workshops and events.

2023 - 2025

IEEE CS Chapter Webmaster

Managed and maintained the Tek-up IEEE Student Branch Computer Society chapter website and social medias, handling content updates, technical maintenance, and digital communications.
