ABOUT

I'm a software engineer and data science student driven by curiosity about how systems work at every level. I build games, tools, and applications while diving deep into the underlying technologies. I'm passionate about solving complex problems across different domains and creating software that delivers real value.

SKILLS

Programming Languages: C#, C/C++, Assembly, Python, Java, Javascript, HTML/CSS, Dart, SQL

Game Development: Unity, Godot, Monogame, Raylib, Sokol

Web Development: ASP.NET, Django, Flask, Angular, React, Nextjs

Mobile Development: Flutter, React Native

Machine Learning: PyTorch, TensorFlow, Scikit-learn, Langchain

Data & Analytics: Pandas, NumPy, Power BI, Row-Level Security

Tools & DevOps: Git, GitHub, Docker, Linux, Blender, REST APIs, CI/CD, Netlify, Render, Photoshop, Figma

EXPERIENCE

Internship at SQUARE-IT

Jul 2025 - Sep 2025

Developed a comprehensive career management HRMS fullstack application. Gained hands-on experience in enterprise software development, database design, and collaborative development practices. Used ASP.NET for the backend and Angular for the frontend.

Freelance Game Developer

2021 - 2025

5-star rated on both Upwork and Fiverr, working on independent game projects and client work with a focus on quality, reliability, and clear communication.

- Fiverr Profile
- Upwork Profile

Senior Game Developer

2021 - 2024

Worked on game prototypes and a commercial indie title as a solo developer, handling all in-engine responsibilities including programming, tool creation, level design, and gameplay implementation.

- Stock Boy

Recreational Programming

2020 - Death

Always creating smaller projects to learn and understand why the technologies we use are designed the way they are, and how they work under the hood.

- Github

EDUCATION

Data Science Engineering Degree - ESPRIT

2023 - Present

Currently pursuing an engineering degree in Data Science, focusing on machine learning, statistical analysis, and software engineering.

Pre-Engineering Degree - IPEIB

2020 - 2024

Completed a multidisciplinary preparatory program with a strong foundation in mathematics, physics, and computer science, preparing for competitive engineering schools.

VOLUNTEERING

Game Jam Creator & Organizer

2025

Founded CSJAM, a 24-hour game jam challenging developers to build complete games from scratch. Led event organization, designed brand identity, and partnered with Tek-up IEEE Student Branch to execute the competition.

- CSJAM

IEEE Member

2023 - 2025

Active member of the Tek-up IEEE Student Branch, participating in technical workshops, competitions and events.

IEEE CS Chapter Webmaster

2023 - 2025

Managed and maintained the Tek-up IEEE Student Branch Computer Society chapter website and social medias, handling content updates, technical maintenance, and digital communications.
